

COMMISSION
OF THE
EUROPEAN COMMUNITIES

Brussels, July 1974.

EURO - BAROMETER N° 1

April - May 1974

Initial results

EURO - BAROMETER N° 1.

Starting this year, the Commission has decided to carry out polls at intervals in the nine countries of the Community, in order to follow the trends in European public opinion with regards to Community activities, particularly the areas of most interest to the public.

The first of these polls took place between the beginning of April and the middle of May and the provisional results are published here. A second poll is planned for October.

Just as a barometer can be used to measure the atmospheric pressure and thus to give a short-range weather forecast, this Euro-barometer can be used to observe, and to some extent forecast, public attitudes towards the most important current events connected directly or indirectly with the development of the European Community and the unification of Europe.

More than 8.900 people, aged 15 and over, were interviewed in their home in accordance with national representative samples drawn up by quota. Approximately 1.000 people were interviewed in each country, except in Luxembourg where 300 were interviewed.

.../...

The poll was carried out by eight well-known institutes (1) and the results coordinated and analysed by the IFOP.

1) These were :

- | | | |
|------------------------|---|---|
| Belgium and Luxembourg | : | INTERNATIONAL RESEARCH ASSOCIATES, |
| Denmark | ▪ | GALLUP MARKEDANALYSE , (x) |
| France | | INSTITUT FRANCAIS D'OPINION PUBLIQUE (IFOP), (x) |
| Germany | ▪ | EMNID ~ INSTITUT, (x) |
| Ireland | ▪ | IRISH MARKETING SURVEYS, |
| Italy | ▪ | ISTITUTO PER LE RICERCHE STATISTICHE E L'ANALISI
DELL'OPINIONE PUBBLICA (DOXA) , (x) |
| The Netherlands | ▪ | HET NEDERLANDS INSTITUUT VOOR DE PUBLIEKE OPINIE
(NIPO) , (x) |
| United Kingdom | ▪ | THE GALLUP POLL, (x) |

The institutes marked x are members or corresponding members of the European Omnibus, which began its work with this enquiry.

.../...

THE MOST IMPORTANT PROBLEM AT THE PRESENT TIME : INFLATION

The first question - an open question - asked those interviewed what in their opinion was "the most important problem being dealt with by their Government at the present time".

In nearly every country the first spontaneous reply was wages and prices : purchasing power, taxation, family budget and standard of living. These were followed, usually at a great distance, by :
(i) the economic crisis, jobs, unemployment and the energy crisis,
(ii) domestic policy,
(iii) the sick society.

Certain differences between countries should be noted :

1°. In some countries, a large proportion of those interviewed had no opinion in the matter : 20% in Belgium and Italy, nearly 30% in Germany and nearly 40% in Denmark. Only 5 or 6% abstained, in France and Ireland.

2°. Inflation was considered the most important problem by over 50% of those interviewed in France and Great Britain, but only by 21 or 22% in Denmark and the Netherlands, and 13% in Luxembourg. (1).

(1) The results for Luxembourg must always be interpreted with care because of the small number of people interviewed. The margin of error in the other countries, where approximately 1.000 people were interviewed, is about 3% for average frequencies.

3°. In some countries, the "crisis" seemed to take on a special colouration : with the emphasis laid on jobs and unemployment in Denmark and Italy, and on monetary problems and speculation in Luxembourg (1).

4°. Internal politics played a larger role in Belgium and Ireland than in the other countries.

5°. In some countries, other problems were frequently mentioned : peace, migrant workers, etc... In Ireland these preoccupations certainly reflect the concern of those interviewed as to relations between the Republic of Ireland and the province of Ulster.

For more details, see Table 1 in the Annex.

o

o o

(1) The result for Luxembourg is surprising but is confirmed by replies to other questions. Apart from an awareness of the country's role as an international financial centre, this may, as in previous surveys, reflect the image of a country whose Prime Minister at that time, gave his name to the plan for the financial and economic union of the European Community. In a poll, except for possible errors, nothing is fortuitous.

.../...

Replies to two other questions confirm that European public opinion is chiefly concerned with economic questions, although other areas of immediate or short term interest can be found among the problems which the nine Member States of the European Community are trying to solve together.(1)

A Rising prices once again occupy first place in the immediate future followed at a distance by energy problems, European currency, difference8 between regions and the protection of nature.

When the replies have been added up to give the two most important probleme, the protection of nature comes third, followed by consumer protection. This is a sign of the existence of minority and underlying preoccupations which should not he overlooked.

Once again there are certain interesting difference between the countries :

1. Nearly 20% of the Danes gave no reply.
2. The European currency problem was considered particularly important in Luxembourg and France.
3. Agriculture and the differences between regions were particularly important in Italy.
4. The protection of nature was considered more important in Denmark and the Netherlands than in the other countries.
5. Only in France dit more than 10% of those interviewed list the political unification of Europe a among the most important problems.

(1) These problems were submitted to each person interviewed on a list, with the following heading : "The nine countries of the EEC - The Common Marke are together dealing with a number of shared problems. Here is a list of them. Could you please tell me which one of these problems is the most important at the present time ?

And which is the next most important problem"?

(1) Continued

- A. Replacing the currencies of all member countries, including (the national currency) with a single European currency.
 - B. Reducing the differenceß between developed regions and less developed regions of the member countries.
 - C. A common fight against rising prices.
 - D. Coordinating the social policies of the member countries in the fields of employment and job training.
 - E. Implementation of a common policy on energy supplies.
 - F. Modernisation of European agriculture by encouraging the most productive farms and providing re-training for people who leave agriculture.
 - G. To have a common policy for the development of scientific research.
 - H. Introduction of a common policy for protecting nature and fighting pollution.
 - I. Introduction of a common policy on aid to under-developed countries.
 - J. Protection of consumers against fraudulent selling and misleading advertising.
 - K. Achieving a common foreign policy in discussions with the United States and Russia.
 - L. To introduce the same educational standards and qualifications so that young people can go to school in any of the countries of the Common Market.
- None** of these problems.
- Don't know: no reply.

.../...

B. In the medium term, that is in the next four or five years, the relative importance of the various problems facing the European Community is slightly different. (1)■

Rising prices remains the first spontaneous reply in each country, but the percentage was lower than when their present importance had to be judged. The problem of energy supplies becomes increasingly important. The protection of nature now occupies third place, with the Netherlands and Denmark still showing the most awareness of this problem.

Even admitting that there is no doubt a "contamination" between the two questions, that is the persons interviewed tended to project their present preoccupations forward to 1978 - 1980, there can be no doubt that European public opinion of 1974 is aware that two problems are becoming increasingly important : energy supplies and the protection of nature.

(1) "Looking at these same problems, which one in your opinion will

- (a). probably remain or become the most important problem over the next four or five years ?
- (b). and the next most important ?"

.../...

AVERAGE CLASSIFICATION OF THE MOST IMPORTANT PROBLEM AT THE PRESENT TIME
AND IN THE NEAR FUTURE IN ALL MEMBER COUNTRIES OF THE EUROPEAN COMMUNITY (1)

	Important at present	Important in 4 or 5 years' time
Common fight against price	1.00	1.00
Implementation of a common policy on energy supplies	4.11	2.78
Introduction of a common policy for protecting nature and fighting pollution	4.33	3.67
Protection of consumers against fraudulent selling and misleading advertising	5.44	7.33
Achieving a common foreign policy in discussions with the United States and Russia	5.56	5.22

(1) Aggregate of first and second choices from a list of 12 items

(See tables 2, 2a, 3 and 3a in the annex).

• • / • •

Community action is considered inadequate

When questioned on the same list of problems which it had just placed in order of importance, the majority of the public in the nine Member States said that what the Common Market ~~was~~ doing ~~was~~ not sufficient. It was just ~~as~~ severe about future ~~problems~~ as it was for those which are important at present.

There is not necessarily ~~any~~ link however between the importance attributed to ~~any~~ given problem and the judgement expressed on Community action. Aid to under-developed countries came at the bottom of the list, but most of those interviewed felt that the Community ought to do more. This attitude is no doubt ~~an~~ attempt to appease the "guilty conscience" of the person interviewed.

None of these problems	2	16	82	100
TOTAL (1)	10	72	18	100

(1) Unweighted total of national samples

There are two possible explanations for the fact that what the Commission is doing is now considered insufficient and it is difficult to choose between the two at the stage reached in the analysis. This critical reply may be a stereotype by which the public expresses its feeling that "the Government never does enough". It is also possible that the public, or at least its more articulate members, is genuinely unsatisfied by the procrastination of its leaders in the pursuit of European unification(1).

It will be observed that this critical - or impatient - majority is particularly large in France (85-92%, depending on whether present or future problems are discussed). In Italy, on the other hand, 20-25% of the population considers that the Common Market is not doing enough.

(See Tables 4 and 5 in the Annex) ■

(1) In a poll carried out in July 1971 in what were then the six Member States of the Community, two-thirds of those interviewed replied that "most people in the Common Market are already prepared to go much further in unification than the Governments".

Joint action or independent action

In the Community as a whole, more than 70% of those interviewed felt that important problems were more likely to be solved by all Members acting together than by independent action by each Member State. In the six original Members the figure was as high as 80%.

ACTION BY ALL MEMBERS WITHIN THE COMMUNITY

OR INDEPENDENT ACTION BY EACH MEMBER STATE

	The "Six"	Ireland	Denmark	Gr.Brit.	Community
	%	%	%	%	%
Joint action	78	80	59	57	73
Independent action	10	16	19	30	14
No reply	12	4	22	13	13
TOTAL	100	100	100	100	100

In Germany, France, Italy, Luxembourg and Ireland 80% of those interviewed favoured joint action; the figure was slightly lower in Bel— (73%) and the Netherlands (70%) and fell to a little below 60% in Denmark and Great Britain.

(See Table 6 in the Annex)

Attitudes to the Common Market.

The replies to the two questions intended to assess attitudes to the Common Market show, as was to be expected, the distance separating Denmark and Great Britain from the other countries, including Ireland.

Nearly 70% of those interviewed in the "Six" considered that membership of the Common Market was a good thing for their country. This figure was slightly higher than that received in the previous poll (September 1973) and is apparently due to the reduced number of people who gave no reply. Only 49% of those interviewed in Ireland, 35% in Denmark and 33% in Great Britain were in favour of the Common Market; in the first two countries the number in favour was lower than in September 1973.

THE COMMON MARKET : GOOD OR BAD.

	The "Six"		Ireland		Denmark		Gr. Brit.		Community	
	Sept. 1973	May 1974	Sept. 1973	May 1974	Sept. 1973	May 1974	Sept. 1973	May 1974	Sept., 1973	May 1974
	%	%	%	%	%	%	%	%	%	%
Good	63	67	56	48	42	35	31	33	56	59
Bad	4	6	15	25	30	31	34	39	11	14
Neither good or bad	19	18	21	19	19	24	22	19	20	18
No reply	14	9	8	8	9	10	13	9	13	9
TOTAL	100	100	100	100	100	100	100	100	100	100

(See Tables 7 and 7a in the Annex).

56% of those interviewed in the "Six" would be very **sorry** if the Common Market were scrapped, compared with 38% in Ireland, 27% in Denmark and 24% in Great Britain.

Comparison with the results of previous polls, carried out on the initiative **of** the Commission of the European Communities in July 1971 and September 1973, shows that support for the Common Market has greatly increased in the "Six" : the percentage of those who would be very **sorry** if the Common Market were scrapped rose from 40% in 1971 to 47% in 1973 and 56% in 1974. The figures for the three new Member States showed practically no change between September 1973 and April-May 1974 ; in Ireland, however, a large number **of** those who were originally indifferent are now opposed to the Common Market.

.../...

REACTION IF THE COMMON MARKET WERE SCRAPPED

	The " Six "			Ireland		Denmark		Gr. Brit.		Community	
	July 1971	Sept. 1973	May 1974	Sept. ■ 1973	May 1974						
	%	%	%	%	%	%	%	%	%	%	%
Very sorry	40	47	56	37	38	30	27	20	24	41	48
Indifferent	40	37	26	40	27	29	27	33	28	36	27
Relieved	5	2	4	17	28	29	31	37	40	10	13

TOTAL	100	100	100	100	100	100	100	100	100	100	.00

(See Tables 8 and **8a** in the Annex).

Lack of information.

In all Community countries, only a little less than a third of those interviewed felt that they were sufficiently well informed on the problems dealt with by the Common Market : 40% in Germany and 22% in Great Britain. The figure for some countries, for example Italy and Ireland, was slightly higher than that obtained in September 1973.

.../...

ASSESSMENT OF DECREE OF INFORMATION

	The "Six"		Ireland		Denmark		Gr. Brit.,		Community	
	July 1971	May 1974								
	%	%	%	%	%	%	%	%	%	%
Sufficiently well informed	29	35	24	35	37	32	17	22	25	32
Not sufficiently	58	50	71	56	55	44	76	70	63	54
do reply	13	15	5	9	8	24	7	8	12	14
TOTAL	100	100	100	100	100	100	100	100	100	100

(See Tables 9 and 9a in the Annex),

What is the main difficulty met personally by those interviewed, when trying to obtain information on European problems ?

The most frequent reply in nearly every country is lack of time of interest. In Great Britain and Germany 13 or 14% of those interviewed said that "the press, radio and television do not mention them sufficiently". In France, 16% blamed the lack of objectivity of the media.

.../...

It must, be remembered however, that between a quarter (France) and two-thirds (**Denmark**, Netherlands) of those interviewed did not reply to this question. This shows that the main reason for the lack of information is that the public **has** no interest in obtaining information on the problems of the **European Community**.

(See Table 10 in the Annex).
